MAYERS

FINE FOOD

CONNECTING PEOPLE OF TASTE

PRODUCT CATALOGUE | ISSUE 03

A HUMBLE BEGINNING

Mayers Fine Food was established by Fred Mayer in 1957, working out of a Darling Point flat, initially importing Norwegian jumpers and ski wear.

Heavy import restrictions at the time limited food imports to just Swiss wafers and Danish and Swiss cheeses.

When these import restrictions were lifted, the company was able to increase the range of imported food products, satisfying the growing demand in Australia for European food delicacies and specialty products.

TODAY

Mayers Fine Food in conjunction with the Arla Foods joint venture offers the most extensive range of food delicacies and specialty products from all around the world. This includes one of the most comprehensive range of cheeses from Australia, Europe and the UK.

We import over 2000 premium food and beverage products and distribute nationally on a daily basis to supermarkets, wholesalers, hotels, delicatessens, manufacturers, shipping providers and airline caterers. Our product range also includes water and beverages, dry goods, seafood, chocolate and patisserie ingredients, plus much more!

COMPANY SNAPSHOT

Today, with the same initiative and passion that has always been at the core of Mayers Fine Food, our aim is to continually supply our customers with the right quality product at the right price and deliver it on time.

Our partnerships with premium International brands ensures we can supply Australian customers with the very best products available from around the world. In turn, our staff work diligently to ensure our global brands are effectively promoted and represented in the Australian market.

If you have any enquires or want to place an order, please contact us via the details below. Our website mayers.com.au also lists our full range of products along with new product information, recipes, upcoming promotions and events.

A SUSTAINABLE FUTURE

GREEN REFRIGERATION

Mayers refrigeration system uses carbon dioxide as the primary refrigerant which is highly efficient and a naturally occurring substance that is harmless to the environment. The carbon dioxide system is cooled with two super-efficient micro charged ammonia chillers which ensure optimal operating conditions are maintained all year round.

The defrosting system employs warm glycol as a heating agent which uses heat waste recovered from the refrigeration system. This type of system uses almost no energy and delivers an extremely dry environment inside the cold rooms. This greatly reduces after defrost heat loads, which in turn reduces compressor run time.

The freezer sub floor uses a brand new Australian patent to harvest low-intensity heat recovered from the liquid CO2 used to warm propylene glycol. It is pumped at a slow speed through a network of specially designed Nylon tubes built into the concrete in the cold rooms' sub floors. This patent is actually a world first as it provides the first sub floor heating system that increases

the energy efficiency of the refrigeration plant. By sub cooling the liquid refrigerant, it reduces the cooling systems power consumption.

Our site is regarded as the most advanced refrigeration plant for storage and distribution of food products in the Southern Hemisphere.

SOLAR POWER

Our warehouse has a 99kw Solar system which covers approximately 10% of our annual energy requirement. We are offsetting approximately 100 tonnes of CO2 per year by producing power through solar energy which is green, clean and renewable. We are currently in the process of expanding our solar program to cover 30 to 40% of our power demand.

HYBRID TECHNOLOGY, THAT'S FUTURE FORWARD

The Mayers sales team drive the Toyota RAV4 Hybrid. It delivers unparalleled low fuel consumption and performance with the ability to travel up to 1145km uninterrupted, without ever needing to be plugged in.

FROM OUR PARTNERS...

OUR CLIMATE AMBITION

- Arla is prepared to increase its investment by more than 40% (>AUD 6.5B) to focus on sustainability, digitalization, new production technologies and product development while also increasing its dividend to support its farmers owners on their sustainability journey!
- To grow the business' responsibility to meet the fast changing eating habits among consumers and their increasing demand for sustainably produced dairy products and improve returns to our farmers owners", Arla Foods CEO Peter Tuborgh
- Arla raised its targets to a 63% reduction of greenhouse emissions by 2030 through

accelerating conversion to green electricity, fossil-free fleets and making all packaging recyclable and having zero virgin plastics in branded packaging (i.e our Castello & Lurpak) by 2030

- Arla supports farmers with:
 - developing models to calculate climate impact at farm level; offering climate-check (10,000 farmer owners across 7 operating countries)
 - in close dialogue with researchers and providing specific advice to reduce impact
- Personalised action plan for the farmer to further climate reductions based on their individual data
 - Climate impact
 - Biodiversity
 - Animal care
 - Societal contribution

Our most recent Climate Check data shows that Arla farmers are among the most climate-efficient dairy farmers in the world with 1.15 kg of CO₂e per kilo of milk.

According to the UN's Food and Agriculture Organization, the global average is 2.5kg.

Heilala[®]

THE GOOD VANILLA

Heilala Vanilla's origins began in 2002 as an aid project founded New Zealander, John Ross, and his family. The Kingdom of Tonga had been ravaged by Cyclone Waka, leaving the Islands and its people shattered in the wake of an exceptionally vicious natural disaster.

Partnering with a local family in the village of Utungake, together they established a small vanilla plantation that grew into Heilala Vanilla.

Grown on rich, Pacific soil and dried under the Polynesian sun, the world's best vanilla is an all-natural product of a perfect climate. With a highly-scientific, unrefined process, and an artisan work culture of the hard-working local farmers and families, Heilala Vanilla is innovating vanilla products and production. Their farmers are dedicated, tending to each plant with in-depth wisdom and expertise.

From its distinctive flavor, its humanitarian mission and fair treatment of farmers, Heilala Vanilla makes people feel as good as the product tastes.

Heilala Vanilla is authentic Bourbon Vanilla. Complex, rich, and bursting with flavour.

NOW AND FOR GENERATIONS TO COME

FrieslandCampina is working on the retention of pasture grazing, continuous improvement of animal health and animal welfare, and the preservation of biodiversity. The aim is to reduce the use of scarce natural resources such as water, raw materials and fossil fuels.

FrieslandCampina aims to keep the emission of greenhouse gases in 2020 equal to 2010 levels. This also applies in case of an increase in milk production. This includes the greenhouse gases

released at member dairy farms, during transport from the farm to production facilities and when the dairy is processed. To achieve climate-neutral growth, FrieslandCampina is working on creating an efficient and sustainable production chain.

CLIMATE-NEUTRAL GROWTH

In order to realise climate-neutral growth, FrieslandCampina is working on several initiatives for an efficient and sustainable production chain. This means sustainable dairy farms, purchasing sustainable (agricultural) basic materials and reduction of the use of energy for the production of dairy products.

Besides, FrieslandCampina encourages member dairy farmers to generate sustainable energy, for example by means of wind turbines, solar panels or biomass, by issuing green certificates.

ON OUR WAY TO CARBON NEUTRAL CHOCOLATES

The reality of climate change – deforestation, carbon emissions - is a real threat to the cocoa ecosystem, the lives of farmers and, ultimately, the taste of cacao. The only way to overcome it is to let nature do what it has been doing for millions of years: thrive. A difficult challenge for humanity, which must work to limit its impact in order to allow nature to flourish. By doing so, we will offer the world quality chocolates that will not damage, but will help us maintain a liveable planet for generations to come.

HOW TO BECOME DEFORESTATION FREE AND CARBON NEUTRAL?

Therefore, our objective is to make West-African farmers become the solution by initiating on-farm interventions and optimization programs that sequester carbon in soil and plants while improving the natural development of the taste of the cocoa we love so much:

- Distribution and planting of cocoa and non-cocoa trees to restore farms
- Farmer awareness raising sessions on environmental protection
- GPS farm mapping to ensure cocoa is not being sourced from forest land
- Distribution of cleaner energy cookstoves in farmer homes

PROTECTING THE SOURCE, SAVING RESOURCES

At S.Pellegrino, we are committed to nourishing the future by acting responsibly at all times. We aim to do that by incorporating a caring attitude in all our business practices, always focusing on premiumness and taste and never compromising on quality. With a forward-looking approach to innovation, we drive positive environmental and social impacts. This caring attitude can clearly be seen in our ambitious commitment to be Carbon Neutral in all of our operations by 2022.

Our mineral water emerges pure and untouched, and we are committed to bringing it to our consumers protected, always taking into consideration the innovation and sustainability of our packaging. The S.Pellegrino product portfolio features a variety of different packaging materials for different purposes, favouring recyclable materials such as PET, glass and aluminium. In order to increase the sustainable sourcing of our bottles, we are supporting the use of recycled PET (rPET) where it is technically feasible and when the feedstock is available. S.Pellegrino is committed to using 35% rPET by 2025.

SUSTAINABILITY & AUTHENTICITY

Animal welfare and milk from small farmers and cooperatives. Since its inception, Rocinante has been committed to both the welfare of people and animals. Always with the desire to preserve the natural environment from which we come and the nearby value chain.

For this reason, our milk comes from small farmers and cooperatives that have been by our side for more than 15 years.

WITHOUT ADDITIVES

We do not add preservatives, except for the rind to avoid the appearance of mold once the cheese is matured, and we always use the cellar curing method to promote the development of its flavor rich in nuances. Only by preserving naturalness from start to finish can we offer you an authentic cheese of which we are proud.

GREEN ENERGY

Committed to nature and the environment, we take advantage of its resources responsibly and using renewable energy technologies such as solar panels and water purification systems, reducing the impact generated by our activity.

RESPONSIBLY FARMED SEAFOOD

The Group is dependent of the sea and has an eternal perspective for its core business.

As a seafood company, both producing in and harvesting from the sea, it is absolutely imperative for the Group to keep the oceans clean and healthy.

We strive to reduce our environmental footprint, minimise our influence on wild habitats and wild salmon stocks.

In aquaculture, we are developing and testing new technology to improve our existing production methods, reducing emissions from our farms and avoiding accidental release of fish from our cages. We have a very good track record in recent years when it comes to accidental release. Our vision is zero accidental release.

We also work continuously to keep the sea free from plastic. We do this through strict monitoring and control of our own production, recycling the cages from our farms and nets from our trawlers, but also through collecting plastic in the ocean with our trawlers through the “Fishing for Litter” - programme.

In our wild catch segment, we have modernised our trawler fleet with the newest and most modern technology available. We conduct all our catches within the strictest rules governing fisheries management, in close cooperation with the authorities and science.

CERTIFICATION

One important tool in the Group’s quality and environmental efforts is certification according to international standards.

Lerøy Seafood Group has been involved in the development of the ASC-standard since 2004. In 2013, Lerøy Seafood Group was the first company worldwide to be certified according to the ASC standard. ASC-certification guarantee that our aquaculture operations are conducted in an environmentally sound and sustainable manner.

PROUD TO SUPPORT THE WORLD LAND TRUST

As a company, we take our corporate social responsibility to our customers, our partners and ourselves – extremely seriously. It’s very much a part of our culture. We are always seeking ways to lessen our footprint and are aiming to achieve zero carbon emissions by 2025. It’s all part of our commitment to global environmental sustainability.

To coincide with the relaunch, we are proud to announce that with every box produced we will be supporting the World Land Trust and the fantastic work they do to protect threatened habitats and wildlife. All of our cardboard boxes are being made using carbon balanced carton.

HAND CRAFTED IN SMALL BATCHES

Maldon salt is made like no other, there’s an art in temperature and timing. A slow warmth uncovering the water’s secret, with skilled hands poised over every batch. Traditional methods and time honoured techniques passed down through the centuries make Maldon salt unique.

CALLEBAUT®

BELGIUM 1911

CALLEBAUT REMASTERED

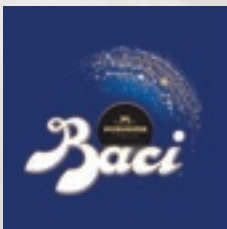

For chefs and artisans, it matters more than ever to know the stories behind the ingredients they work with, their origin, and how they've been grown. All to understand true quality. We share that concern greatly. Since 2012, we have been pioneering in bringing sustainable cocoa farming to a higher level together with Cocoa Horizons. From that moment on, all Finest Belgian Chocolates are made from sustainable cocoa. And today, we take it a giant leap further.

From now on, the cocoa liquors for our 811 and all our Finest Belgian Chocolates are made from traceable cocoa beans. The lots of beans can be traced back to the farming communities in Ghana, Ivory Coast and Ecuador we directly buy from. With this traceability guarantee, we want to be transparent about the communities who grow our beans.

What's more: all the farms we work with participate in the Cocoa Horizons program that focuses on:

Prospering Farmers: improving farmers' livelihoods through quality cocoa, elevating them to cocoa craftsmen and empowering women farmers.

Zero Child Labour: fostering a new generation of young farmers.

THE COMMITMENT OF BACI® PERUGINA®

Baci® Perugina® is committed to treating its employees with respect, to conducting its business sustainably and with care towards chocolate production and to contributing to preserving resources for future generations.

SUSTAINABLE DEVELOPMENT

Baci® Perugina® also preserves water thanks to the purification plant of San Sisto, with which we were able to reuse 10,000 square meters of water between 2017 and 2018. All the Nestlé Italia plants together have been able to meet our Zero Waste for Disposal goal — 3 years ahead of the targets set for 2020.

BETTER QUALITY OF LIFE

Baci® Perugina® adheres to the Nestlé Cocoa Plan, the program that deals with training cocoa farmers, improving their economic and sanitary conditions. We believe that the promotion of gender equality and the construction of schools raises the quality of life of the entire community in the long run.

ATTENTION TO THE ENVIRONMENT

As part of the Nestlé Group, Baci® Perugina® promotes environmental protection by solely purchasing energy from renewable sources. In 2007, a cogeneration plant was put into operation for the production of high-efficiency energy.

A BETTER COCOA

Baci® Perugina® is RA certified — a sustainability program that prevents the improper use of chemicals and uncontrolled deforestation, which present a real threat to the sustainability of cocoa farming. The goal is to create an efficient certification and traceability program for socially and environmentally responsible cocoa production that meets the needs of both producers and markets.

THE CO2 ZERO SUPPLY CHAIN IS A REALITY

“We announce the extraordinary result of achieving carbon neutrality for all the activities of our group. Whatever the response of science to climate change and its causes will be, our result is still a success because the reduction of greenhouse gas emissions is invoked by all scientists, as the dramatic increase in GHG emissions represents a negative fact for the environment”, explains Roberto Brazzale, president of the Group.

The Brazzale dairy Group is the first one to reach the goal of carbon neutrality and the uniqueness of its model lies in having achieved this neutrality through a production and productivity growth by almost three times. The adoption of innovative practices in climatically favoured regions allows, in fact, to develop innovative production processes that avoid dangerous drifts towards remedies that depress growth.

The “Carbon Neutrality” is the culmination of the twenty-year “green revolution” begun by the Brazzale Group in 2000: a radical innovation in the production processes that led to the creation of Ecosustainable supply chains, which are based on the principle of “doing things where they can succeed best”.

THE GRAN MORAVIA ECO-SUSTAINABLE CHAIN

The supply chain consists of a network of more than 75 farms, directly coordinated by Brazzale technical staff. This network counts more than 80.000 hectares of cultivated lands and almost 17.000 dairy cows: 4.5 hectares of land for each cow. The cattle is selected to obtain the finest proteins and the best milk for cheese production. The large allocation of land allows farmers to feed cows with fodder grown directly on their own ground. The count of nitrate per hectare is several times lower than the limits that EU has set to protect groundwater. The cattle lives in an environment that has the highest standard of ethics and animal welfare.

The natural rainfall of the region allows the farms to not using artificial irrigation causing a great saving in terms of sweet water and fuel, avoiding fodder contamination.

The superior qualities of the supply chain are reflected on the characteristics of the finished product: in the hard cheese Gran Moravia there is no aflatoxin contamination and the “closed cycle” system allows a constant and immediate traceability of each phase. The Italian technical staff constantly advises the optimal choices to select the finest fodder and grants the high quality of the milk.

ROYAL FRIESLANDCAMPINA

Frico is one of the brands of Royal FrieslandCampina. Although a multinational company with many products loved all around the world, Royal FrieslandCampina still remains a cooperative of dairy cow farmers. They are both the owners and supplier of fresh milk, and the beating heart of all our high quality products.

In 1877, when Pietro Barilla established a modest pasta shop in Italy, he had a dream to supply his neighborhood with the freshest, most delicious food to be shared at the family table. What he may never have imagined was that his product would become the best-selling pasta in Italy and around the world.

ILLY

Illy has been perfecting its unique blend of nine Arabica origins for more than 80 years, to offer the world its greatest coffee.

Still proudly family owned, Illy will be brought to life across Australia its guarantee to deliver everywhere and on every occasion the same unmistakable flavour, to offer the world the best coffee and, in the words of Ernesto Illy, “a smile on the lips of those who drink it.”

ANTICHI COLLI

With its range of balsamic vinegars, glazes and dressings, is the result of tireless hard work by the Bavieri family. For decades, they have cultivated a great love for the produce of their local area, obtained with respect for nature and the work of man.

A close-up photograph of a person's hands, wearing a dark blue denim shirt, holding a large, fluffy mound of white, granular substance. The substance appears to be a thick, white powder or finely ground material, possibly a condiment or sauce. Some of the substance is falling from the hands, creating a blurred trail of white particles. The background is dark and out of focus.
